

# Food and Population

## How Many Can We Feed?

Is food justice possible?

The number of chronically hungry is increasing, the UN reports, and has reached 1.2 billion.

Can we feed a growing number of humans? When food production is threatened by climate change? Soil erosion? Sinking water tables? Peak oil? And loss of biodiversity?

**PUBLIC FORUM**  
**on Global Issues**  
**Friday Nov. 20/09**  
**7:00 to 9:00 pm**  
**Koffler Institute**  
**569 Spadina Ave, Room 108**  
**(Just North of College St., Toronto)**

Come and hear Brewster Kneen, the Ottawa based author of books on food and agriculture, leading demographer Susan McDaniel, Director of the Prentice Institute for Global Population and Economy, University of Lethbridge, Alberta, and Robert Hoffman, of WhatIf?Technologies in Ottawa, who will show computer simulations of possible futures with a variety of food and population scenarios. Moderator Mustafa Koç, Ryerson University.

**All Welcome. Free Admission. Donations Appreciated.**

Students and teachers, politicians, reporters, and other concerned citizens.

Presented by the Global Issues Project of Science for Peace and Canadian Pugwash.
