

POLITICAL SCIENCE / SECURITY STUDIES

“The Open Skies Treaty deserves more attention given that it has played a significant role in the past and can be even more vital in the future. In this important book, Peter Jones provides a great service by offering just what is needed to place the Treaty in historical context and to highlight the potential future role for aerial monitoring.”

—GEORGE P. SHULTZ

Distinguished Fellow, Hoover Institution, Stanford University and Former US Secretary of State

“This book offers a fascinating behind-the-scenes story of a NATO-Warsaw Pact negotiation at the moment when the Soviet Union was coming apart. It provides an invaluable case study in the linkage between national leaders and their experts; new insights into a turning point in history; a riveting portrait of multilateral diplomacy; and a suspenseful tale of how professionals interacted as the ground beneath their feet collapsed.”

—JAMES GOODBY

Annenberg Distinguished Visiting Fellow, Hoover Institution.

“*Open Skies* is a meticulous account of one of the most complex multilateral arms control treaties ever negotiated. Dr. Jones skillfully describes the evolution of the Open Skies Treaty from its inception, highlighting the delicate interaction of the disparate stakeholders: diplomats, scientists, and military. An insightful and unique look into the negotiating dynamics at the end of the Cold War.”

—DIANA MARVIN

Bureau of Arms Control, Verification and Compliance, U.S. Department of State

“*Open Skies* is a crash course on negotiations that de-mystifies the process and equips rookies and veterans alike to be much more effective negotiators. Every person assigned to a Geneva, Vienna, or New York delegation ought to read this book before reporting for their first day on the job.”

—AMY E. SMITHSON

Senior Fellow, James Martin Center for Nonproliferation Studies

*Peter Jones is an Associate Professor in the Graduate School of Public and International Affairs at the University of Ottawa, Canada, and an Annenberg Distinguished Visiting Fellow at the Hoover Institution at Stanford University.*
